

Project Proposal: Improve Reporting

Summary

We should improve the reporting process because it takes too long and people complain about it.

Problem

Reports are slow. Everyone is frustrated. We need to do something about it. The current system is old and not working well.

Solution

We could use some AI or automation to make it better. Maybe Power BI or something similar. We would need to hire someone to build it.

Benefits

- Reports will be faster
- People will be happier
- Less work for everyone
- Better efficiency

Next Steps

We should start as soon as possible and try to finish quickly.
